WWW.GOLDMUND.COM

SINCE 1978...

For over four decades, Goldmund has exemplified pioneering excellence in the realm of audio equipment, ceaselessly pursuing the pinnacle of precision and quality. Our enduring dedication to audio perfection has garnered widespread acclaim, anchored by the iconic stature of products such as the esteemed Reference turntable, Apologue speakers, and Telos power amplifiers.

Today, we proudly stand as unrivaled purveyors of audio refinement, uniquely positioned to unveil the true essence of sound reproduction through flawless alignment in frequency, phase, and time response.

In the intricate tapestry of luxury audio, our systems emerge as paragons of fidelity, elevating the auditory landscape to unprecedented levels of authenticity. The cherished "Swiss Made" insignia, emblematic of peerless craftsmanship, remains an indelible hallmark of our heritage and unwavering commitment to excellence.

At the heart of Goldmund's legacy lie cutting-edge innovations, meticulously crafted through a symphony of expertise and ingenuity. Our journey is one of relentless pursuit, unfazed by fleeting industry trends, as we forge our path with bespoke technologies tailored to exceed expectations.

In the spirit of Leonardo da Vinci's enduring maxim, 'Ostinato rigore' — a testament to unwavering rigor — we uphold an unyielding standard of excellence. With each endeavor, we invite our discerning clientele to embark on an immersive journey, where unparalleled sophistication meets the purest expression of audio artistry.

A CULTURE OF EXCELLENCE

ABOUT US

IGNITE YOUR SENSES

THE ART OF SOUND

In the heart of Geneva, Switzerland, there lies an enclave where dreams are meticulously crafted, honed, and brought to life by expert hands.

This is a realm where the essence of music and film transcends imagination, a sanctuary where the purest emotions are captured in the most authentic soundscapes. For over four decades, our unrelenting pursuit of acoustic perfection has been the cornerstone of our legacy, merging tradition and innovation to etch legendary moments in time.

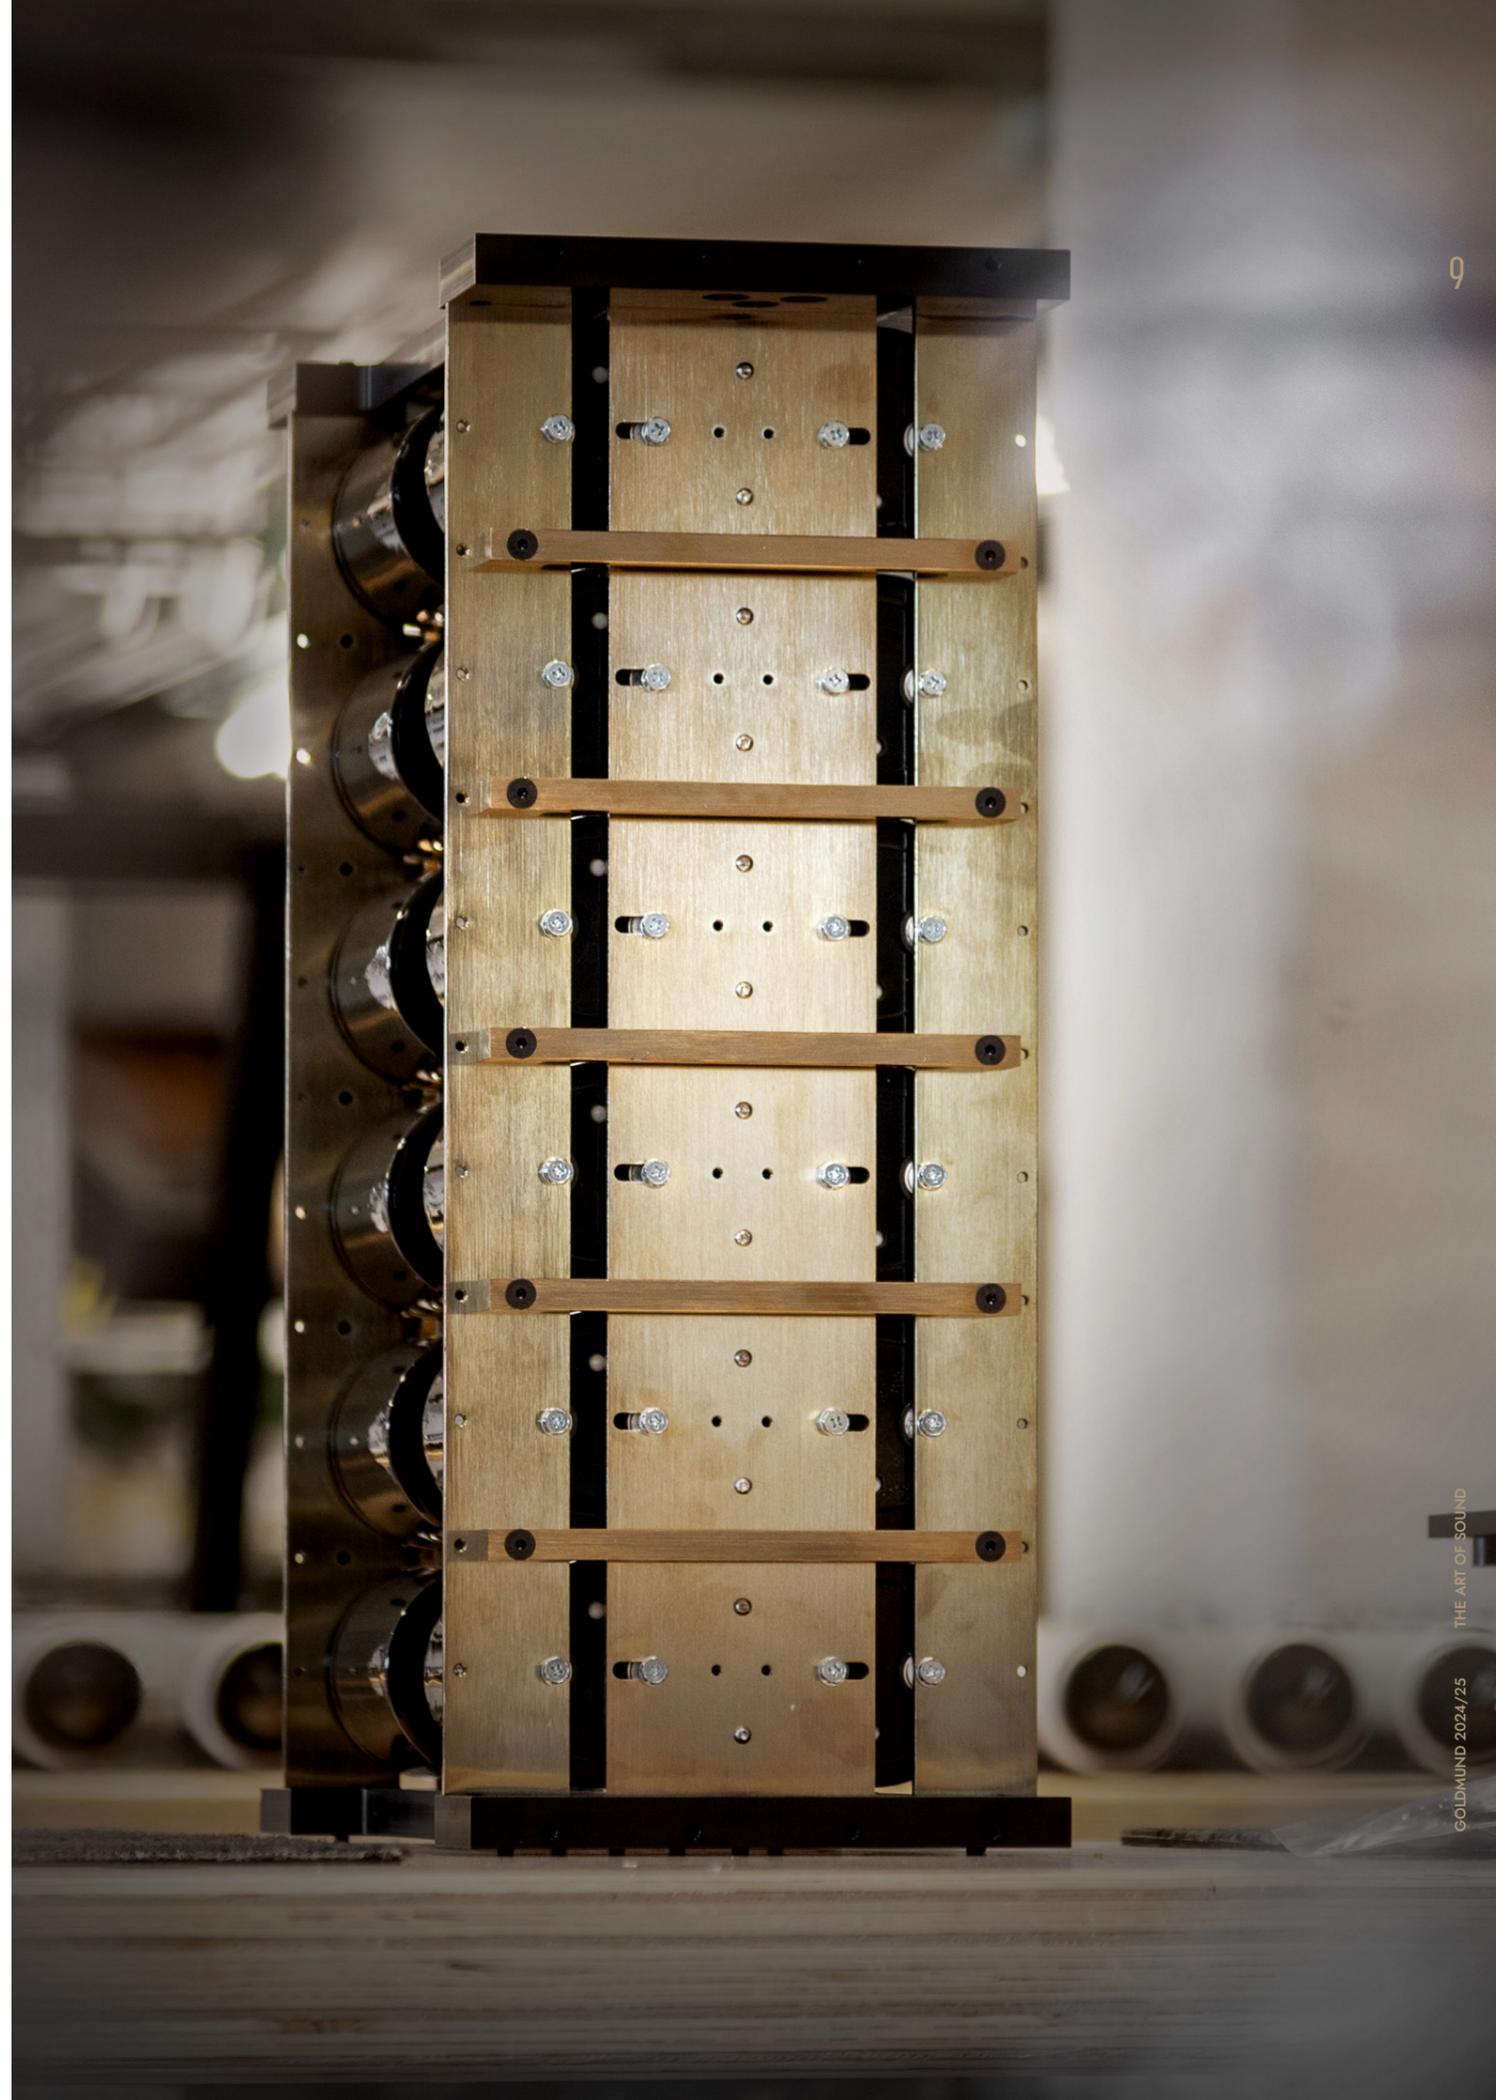

HEAR THE MUSIC, NOT THE SOUND SYSTEM

At Goldmund, we have elevated sound fidelity to an art form. Our pioneering expertise, nurtured in Switzerland since 1978, minimizes the coloration of sound by mechanical and electronic components, achieving an unparalleled level of purity. The result is a sonic experience that unveils every nuance of the audio recording with impeccable clarity and transparency. Our commitment to excellence extends to our selection of materials, choosing only the most superior, ensuring that each Goldmund creation is not just a product, but a masterpiece. In our quest, Goldmund harmonizes the realms

of art, craftsmanship, and technology to present an audio reproduction unmatched by any other system. Our philosophy is to bring the visceral intensity and emotional depth of a live performance right into your home.

AESTHETIC MASTERY, SCULPTURAL DESIGN

Each Goldmund creation undergoes a journey of aesthetic refinement, transcending beyond mere functionality to become works of art, timeless and iconic. Our signature elegant grey aluminium alloy is designed to seamlessly integrate into any living space, be it classic or contemporary. Our designs, characterized by their distinct personality and exquisite craftsmanship, are instantly recognizable, embodying our understanding of true sophistication.

1978

Goldmund emerges in France, unveiling the T3 computer-controlled tonearm.

1980

Michel Reverchon acquires Goldmund, relocating it to Geneva, Switzerland.

1983

The Reference turntable wows crowds at CES, while The Absolute Sound lauds the Studio Turntable LP as one of the 12 Analogue Components.

1987

Debut of Goldmund Electronics with the Mimesis 2 preamplifier and Mimesis 3 power amplifier.

1994

Introducing the modular Epilogue speaker system with unique metal alloy enclosures.

1979

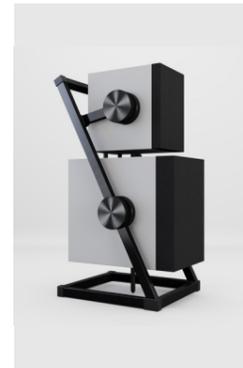

Introducing the direct-drive Studio turntable, featuring an acrylic platter and groundbreaking "Mechanical Grounding" tech.

1990

Goldmund pioneers digital with Alize DAC in the Mimesis 10 and Mimesis 36 CD Transport.

1997

Unveiling the Mini Logos Passive, Goldmund's first high-end speaker for multichannel setups.

2002

Birth of the Mimesis 24 digital processor – the first step towards the extreme multi-channel.

2007

Celebrating 25 years with the limited edition Reference 2 turntable.

2013

Goldmund achieves wireless excellence without compromising sound quality.

2022

Goldmund's evolution continues with Gaia-inspired new design language, departing from the traditional frame from previous speaker models.

2023

Goldmund presents its first pair of speakers with WisA and Bluetooth connectivity - the Pulp.

2003

Goldmund introduced the first active speaker – Mini Logos Active.

Goldmund brings the Proteus HT Media Room to life, integrating sound and image seamlessly.

2017

NextGen Amplifiers redefine Goldmund's legendary performance.

2009

The mighty Telos 5000 mono power amp storms the scene with 5000 watts of power.

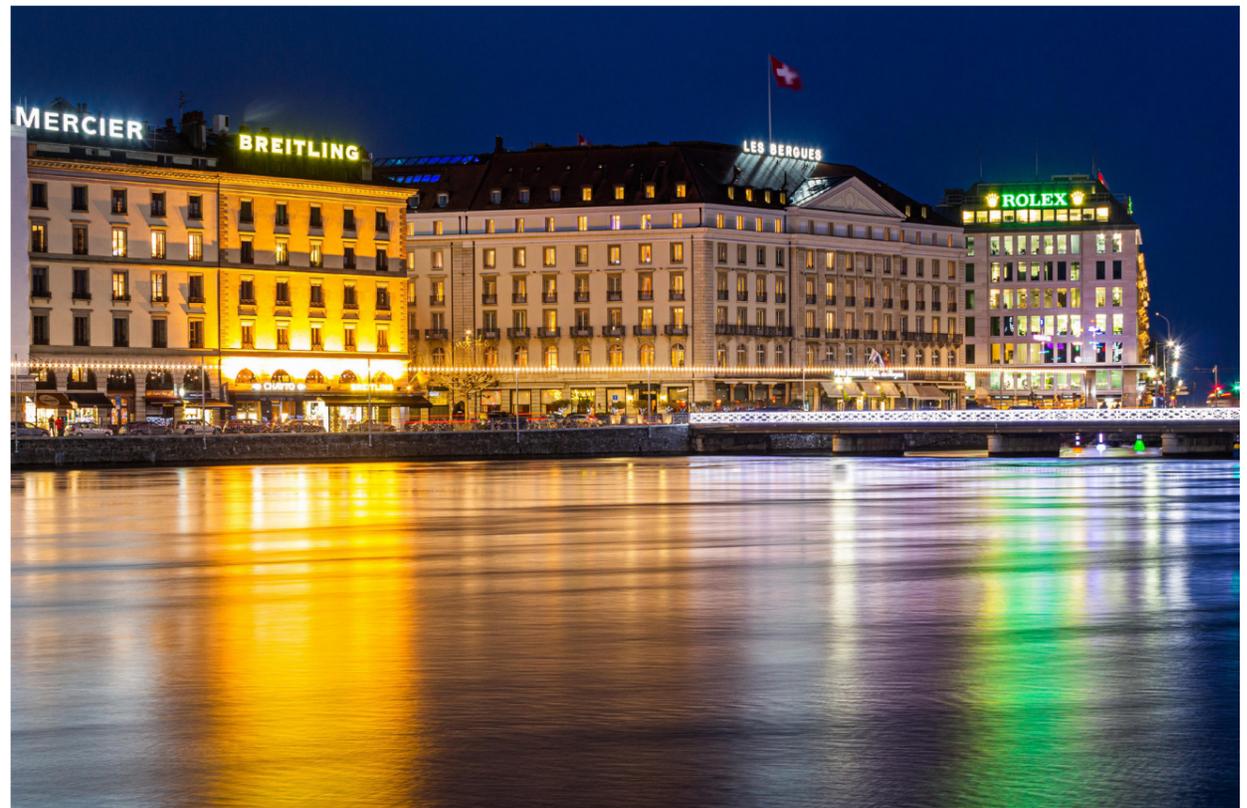

GLOBAL PRESENCE

Goldmund is distributed in 25 key markets around the world, including North America, Europe, Asia, Australia, and the Middle East. The brand's products are available through a network of authorized dealers and distributors who are trained to provide customers with expert advice and support.

Only Official Goldmund Distributors and Retailers are allowed to sell and maintain Goldmund Sound Systems. With the necessary skills, technical know-how and special equipment, they guarantee the

authenticity of each and every part of your Goldmund system and help you make the choice that will last. Find out more on our website: goldmund.com/find-a-distributor

SWISS MAISON

Goldmund is based in Geneva, Switzerland, which is known as the heart of the luxury watch industry. The city is home to some of the world's most prestigious watch brands, including Rolex, Patek Philippe, and Audemars Piguet. The watchmaking heritage of Geneva is reflected in Goldmund's commitment to craftsmanship, attention to detail, and dedication to creating products that are both

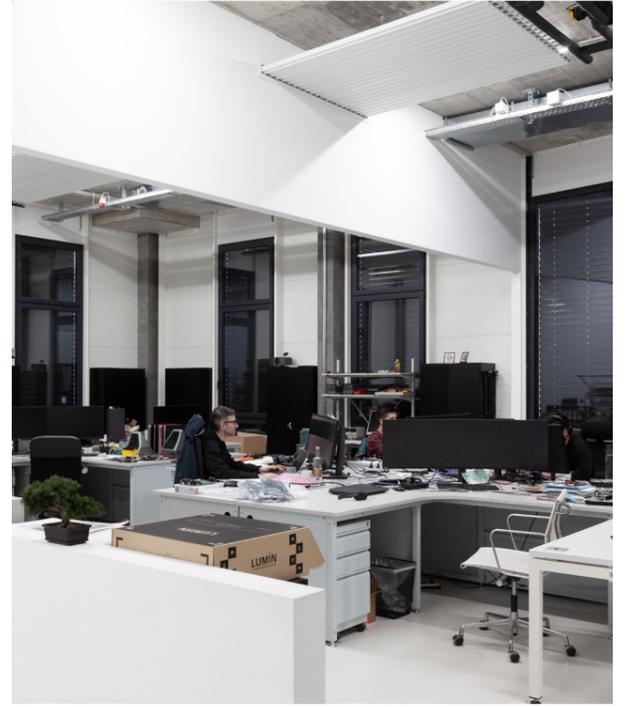

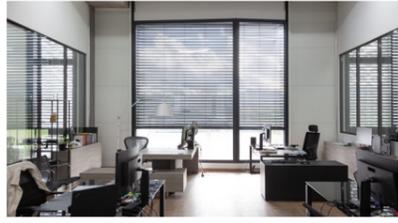

technically advanced and aesthetically beautiful. The city's reputation for excellence and elegance is also reflected in Goldmund's product designs, which are characterized by their sleek lines, high-quality materials, and attention to detail.

OUR ATELIER

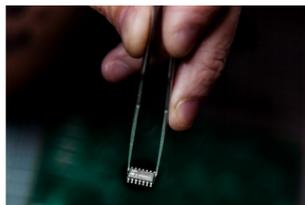

Goldmund's location in Geneva is a testament to the brand's commitment to excellence and its dedication to creating high value products. In 2023, Goldmund moved into a new building called Les Cabinotiers, which has allowed the brand to increase its manufacturing and service capabilities.

The new facilities are located in a prominent industrial area of Geneva and are designed to reflect Goldmund's commitment to excellence and elegance. The building features state-of-the-art production facilities, including a dedicated assembly line and testing facilities, as well as a customer service center and showroom. The move to Les Cabinotiers reflects Goldmund's commitment to growth, its dedication to creating exceptional audio products, and its unwavering focus on meeting the needs of discerning customers around the world.

KEY VALUES

INNOVATION

We blend patented cutting-edge technology engineered with Swiss precision, unparalleled performance, and recognizable design in every single state-of-the-art sound system we craft.

(RE)DEFINING AUDIO

Committed to pushing the boundaries of audio technology and delivering products that are both technologically advanced and aesthetically beautiful. Goldmund's passion for audio is evident in every product we create.

PASSION

We are driven by our clients' discovery of a transformative audio experience. That moment is when our love for what we do becomes most rewarding & motivates us to constantly challenge our work and never stop improving.

EXCELLENCE

The guiding principle behind every action we take. Our products, process, people and service are amped up with meticulous expertise held at an uncompromisable standard.

TECHNOLOGIES

Goldmund's unwavering pursuit is to deliver unparalleled concert-like sound experiences by constantly pushing boundaries and employing innovative solutions. For over 45 years, our world-class engineers have developed cutting-edge technologies and incorporated superior external advancements, enhancing both convenience and performance. Every element, from links in the chain to individual components, embodies their wealth of knowledge and expertise.

DIGITAL SIGNAL PROCESSING (DSP)

Goldmund stands as a trailblazer in the HiFi industry, particularly in the realm of Digital Signal Processing. Our active speakers are filtered with digital coefficients, eliminating the need for physical filters and transitioning to a software-based approach controlled by DSP technology, encompassing parameters such as gain and delay. The DSP configurations are calculated through Proteus - Goldmund's proprietary mathematical model -, and incorporate the advanced Leonardo® time correction software. This innovative methodology empowers us to explore infinite design possibilities and achieve unparalleled precision in sound correction.

LEONARDO® TIME CORRECTION

Phase distortion affects sound realism by altering the size and depth of the soundstage and other parameters, along with the timbre of the sound source. Leonardo® time correction algorithm removes most of these sonic alterations by digitally realigning the signal frequencies in time.

PROTEUS LS®

Proteus LS is a mathematical software based on several specifications such as loudspeaker system solution, enclosure shape and volume, T&S parameters, driver location, and diffraction at box edges. The software calculates the loudspeaker system in impedance, volume velocity, membrane displacement, and sound pressure anywhere in space, amplitude, phase and group delay. Our proprietary digital filtering calculations and Leonardo® time correction are incorporated in the Proteus LS software.

PROTEUS HT®

Goldmund's Proteus HT software bases on room architecture and other variables to calculate the ideal home cinema setup, including optimal screen size, listening position, speaker placement, and settings. Protected by a patent, Proteus HT© refines room parameters through rigorous modeling before production, ensuring unparalleled system performance and a seamless, immersive audiovisual experience.

MECHANICAL GROUNDING™

Goldmund's Mechanical Grounding™ building technology utilizes principles of physics to dissipate vibrations from structures to the ground, minimizing speaker resonance. This technology maintains sound naturalness by preventing excessive accentuation of certain tones, resulting in a more authentic audio experience.

TELOS® AMPLIFICATION

Telos® amplification technology represents a paradigm shift in audio fidelity, reducing intermodulation and time distortion. By enhancing linearity across all stages, Telos® amplifies audio signals with unparalleled purity and transparency at any volume level at near zero distortion.

D/A ALIZE D/A TECHNOLOGY

Goldmund Digital to Analogue technology employs a unique ultra-linear, time-coherent analogue filtering process, achieving time errors smaller than 100 picoseconds within the bandwidth. This innovative approach ensures uncompromised audio fidelity, setting a new standard in digital-to-analogue conversion.

02 ACTIVE SPEAKERS

THE POWER OF SIMPLICITY

In an era where the pursuit of simplicity intersects with a desire for fewer yet more intuitive audio components, the landscape of auditory excellence undergoes profound transformation. However, amidst this pursuit of simplicity, Goldmund maintains steadfast belief that quality need not be sacrificed.

with these evolving customer expectations. Over time, our collections have undergone a metamorphosis, gracefully transitioning from passive to active speakers, embracing the shift from analogue to digital technologies, and evolving from wired paradigms to the liberating realms of wireless systems.

THE EVOLUTION OF AUDIO EXCELLENCE

Our relentless research and development, marked by a myriad of patent registrations and development of one-of-a-kind proprietary technologies, have culminated in a series of evolutionary strides that align seamlessly

EMOTIONALLY RESONANT EXPERIENCES

At Goldmund, our unwavering commitment to pushing the frontiers of refined design coupled with unmatched performance remains our guiding principle. The result of this devotion is a lineage of speakers that not only excel in quality but also evoke deeply emotional auditory experiences.

ACTIVE SPEAKERS

AN ODE TO NATURE

Descendant of the legendary Apologue and Epilogue speakers, the Gaia active speaker follows in the footsteps of its predecessors and offers even more powerful and innovative sound quality. Gaia marks the beginning of a new generation of iconic loudspeakers, delivering every decibel in its purest form.

ACTIVE SPEAKERS

SOUND TRANSPARENCY

The Gaia pair consists of five boxes stacked vertically, reaching a height of 2.10 meters. Each speaker is equipped with eight drivers and eight channels of Telos amplification. Constructed entirely from Goldmund's special aluminum alloy, Gaia offers both sonic clarity and aesthetic elegance.

Cécile Barani faced the challenge of balancing the ethereal presence of sound with the physical presence of the loudspeaker in designing the Gaia. She believed the visual aspect of the speaker should not overshadow the listening experience, even if its appearance is striking and intriguing.

The loudspeaker, perceived as a monochrome monolith with invisible assemblies, stands in the space like a totem pole. It is only through listening that it reveals its full essence, akin to a showcase unveiling a tonal jewel.

MYTHOLOGICAL GRANDEUR

Drawing inspiration from Theia, the Greek titaness of sight and heavenly glory, this loudspeaker system is a tribute to the dazzling brilliance of the sky, the sun, and the moon. Theia's name, synonymous with the radiance of the cosmos, infuses this masterpiece with the essence of celestial beauty, offering an auditory experience as clear and splendid as the heavens.

CRAFTED FOR CONNOISSEURS

Theia offers flexible connectivity options, allowing for both wired and wireless connections to the sonic source. In a wireless setup, each pair of speakers can easily connect to a computer. Theia does not compromise on sound quality. The speaker's DSP operates at an impressive 24-bit/96kHz,

guaranteeing that the audio output maintains the highest fidelity.

Its abrupt, sculpture-like shape and curved sides confer a mineral, unchanging and timeless appearance. Refined, powerful and titanic are the characteristics of the great Theia.

The purest sound reproduction —all in one standalone speaker

that turns invisible from the moment you press play. Made at the Goldmund standard of performance, fully integrated build, and minimalistic design, Theia brings every decibel to life faithfully, amplifying music to a new realm of absolute audio immersion that makes music be felt, not listened to.

POLISHED DESIGN, SUPERIOR SOUND

As the second smallest sibling in a quartet of revolutionary audio masterpieces, Rhea joins its illustrious kin—the majestic Gaïa, the sublime Theia, and the dynamic Asteria—in setting unparalleled standards in the sphere of high-

fidelity audio systems.

Emerging from a rich heritage of mechanical innovation, Goldmund's latest speaker series breaks free from the visible frame styling of the Apologue collection for a more streamlined ethos inspired by Gaia's iconic design.

Rhea is exquisitely fashioned from a distinct grey aluminium alloy, harmoniously paired with matching grilles. Micro-blasted aluminium is used for the vertical and edge enclosure panels, offering a stark, elegant contrast to the horizontally aligned internal panels, which are adorned in brushed aluminium.

SLEEK SOUNDS

Technology and design combined, Pulp is a multi-faceted speaker.

Designed by Cecile Barani, the Pulp collection differs from Gaia in its modularity and size. Designed as a family of pieces to be displayed in space, it unfolds like a

sound punctuation. Always with the aim of proposing a radical object, the elements are conceived as pure cylinders.

The special feature of these speakers is the swivelling textile part that hides all the technical elements. For purists, the small and sleek cylinder integrates a pivoting

textile part for direct listening, making it a 360° readable object. Its circular form and its diamond-like texture pay homage to the wheels that once adorned the Apologue's speaker frame, blending past design elements into the future of Goldmund's speaker design evolution.

GOLDMUND 2024/25 THE ART OF SOUND

PIECE OF ART

In the realm of high-fidelity audio, few names resonate with the same reverence and awe as Goldmund. Among its illustrious creations, one masterpiece stands out as the epitome of innovation, elegance, and auditory excellence: the Apologue loudspeaker. First introduced in 1987, the Apologue has since become a symbol of the pinnacle of sound engineering and design, captivating audiophiles and connoisseurs alike with its unparalleled performance and striking aesthetics.

ICONIC

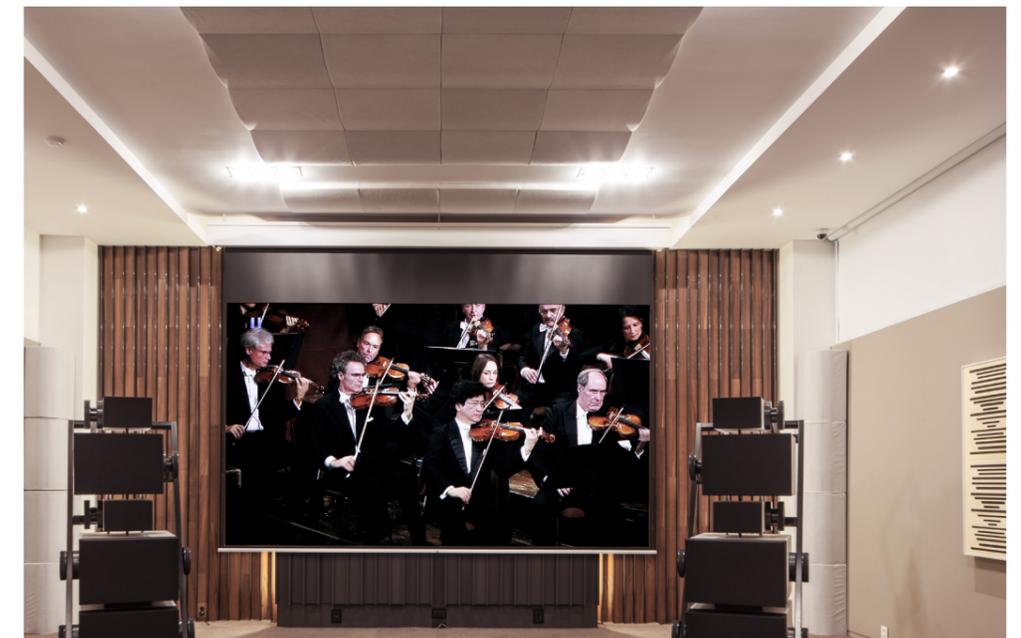

Originating from the Greek word "apologos," meaning "a story," the iconic Apologue is a tale of acoustic brilliance. Selected in 1987 by the New York Museum of Modern Art for its unique design and lauded by audio enthusiasts worldwide for its exceptional sound quality, only 50 pairs of this legendary speaker were produced. The Goldmund Apologue, designed by Italian artist Claudio

Rotta Loria, stands as a major milestone in Goldmund's history.

After the debut of the first passive version in black lacquered wood, the Apologue evolved into the Anniversary version, featuring grey aluminum and a sophisticated 6-way active system in a limited series. A new edition in black matte aluminum is now part of the collection.

At Goldmund, we don't develop technologies or manufacture equipment for the sake of it. We believe that the closer the sound reproduction is to perfection, the more intense the emotional experience. This philosophy drives us to focus on the results our technologies can deliver. Our audio systems and devices are handmade in Switzerland, embodying the intersection of cutting-edge technology and passionate craftsmanship.

STATE OF BLISS

In Eastern spirituality, 'Samadhi' represents the highest state of meditation, a blissful union of individual consciousness with the universal divine. Goldmund's Samadhi wireless speakers embody this transcendent state, elevating listeners to a realm of audio enlightenment. These speakers create an immersive experience that transcends the ordinary,

transporting listeners into a state of harmonious bliss. Through Samadhi speakers, Goldmund facilitates a connection with the divine frequencies of music, guiding listeners toward profound serenity and joy.

As the illustrious descendant of Goldmund's Apologue loudspeaker, Samadhi features a sophisticated two-aluminum-box construction, elegantly stacked and

cradled within a metallic frame. The design includes refined round scroll wheels with a diamond-shaped texture, providing both secure fastening and style. In this symphony of design and engineering, Samadhi stands as Goldmund's testament to the fusion of technology and aesthetics, defining the pinnacle of the Apologue lineage.

Tethys is not just a technical marvel; it is a work of art. Its sleek, elegant design seamlessly integrates into any environment, while its exceptional performance elevates the listening experience to new heights.

QUALITY SOUND, PERFECTED

Embracing the legacy of its larger sibling, the revered Tethys, the Melos Passive draws inspiration from both the Tethys and the Gaïa speaker, seamlessly fusing advanced technology with timeless aesthetics. Its name, 'Melos,' an homage to the melodies of ancient Greece, captures the essence of this speaker's capability — to deliver musical harmony and tune with unparalleled precision.

PRECISION SOUND

The Melos Passive loudspeaker uses advanced crossover technology to ensure seamless frequency integration and optimum dispersion. This ensures

precise control and balancing of frequencies, resulting in a truly immersive and realistic soundstage.

Wrapped in Goldmund's iconic grey aluminium finish, Melos Passive is equipped with high-

end drivers to reproduce sound with extreme precision, offering extended frequency response and exceptional dynamic range, ensuring that every subtle nuance and emotion of the music is faithfully conveyed.

A MELODY IN YOUR EARS

Designed as an embodiment of auditory purity, the Melos Passive Loudspeaker is housed within a sleek, monolithic cube. Engineered with utmost precision, this exquisite speaker faithfully reproduces sound in its truest form. The delicate balance between technology and aesthetics finds expression in the distinctive lines, evoking the raw beauty of rock formations – a nod to nature's influence and Goldmund's commitment to authenticity.

FEWER COMPONENTS. NO COMPROMISE.

Designed for discerning listeners who seek fewer audio components without sacrificing sound fidelity, the Telos 670 unites preamplifier and amplifier functions in a single, compact, beautifully crafted chassis—engineered to drive passive loudspeakers with effortless authority.

Telos® amplifiers are renowned for their absolute control over loudspeakers, delivering clean power while preserving the original signal's integrity. Low-frequency precision is a particular hallmark: the Telos 670's reduced output impedance enhances micro-dynamics and prevents woofer overshoot, resulting in tighter, more defined bass. Whether rendering a whisper or a full-scale

orchestral crescendo, the Telos 670 delivers clean, dynamic sound from the first watt to the last.

The result is a listening experience defined by breathtaking realism and emotional depth. The Telos 670 marks a new chapter in Goldmund's relentless pursuit of audio perfection—a fusion of power, simplicity, and sonic truth.

AMPLIFIERS

UNMATCHED PRECISION

At the core of Goldmund Preamplifiers' uniqueness lies their meticulous construction and innovative technology. These devices act as a crucial conduit between the source and output, preserving the integrity of the audio signal with minimal interference. This dedication to precision ensures a sound that remains as close to the original recording as possible, offering an unparalleled listening experience.

TAILORED AUDIO EXPERIENCE

Goldmund's preamplifiers are distinguished by their adaptability and precision. They offer an array of customizable settings, allowing users to fine-tune their audio experience to their

exact preferences. Whether it's adjusting the tonal balance, managing input sensitivity, or refining the soundstage, these preamplifiers provide an unmatched level of control, making them ideal for audiophiles with discerning tastes.

THE PINNACLE OF SOUND MASTERY

In essence, Goldmund Preamplifiers embody the perfect blend of technical mastery, auditory precision, and artistic design. This combination makes them an unparalleled choice for discerning audiophiles seeking the ultimate in sound control and quality. Their superior engineering and innovative features set a new standard in the world of high-fidelity audio.

FEEL THE PERFECTION

In simple terms, a digital/analogue preamplifier fine-tunes and boosts the audio signals from various sources before they reach your passive speakers. The Mimesis Excellence excels in this role, delivering top-notch sound quality.

At the heart of the Mimesis Excellence is the new Themis audio board, a significant advancement in the HiFi space. Each audio channel—left and right—has

its own dedicated audio card, allowing them to process sound independently. This separation minimizes noise, keeping the audio signal clean and clear. Each channel is also equipped with a state-of-the-art Digital-to-Analogue Converter (DAC) and volume control, ensuring the purest sound and handling a wide range of volumes—from the lowest to the highest decibels—without distortion.

The Themis audio board features innovative blocked mechanical shielding to block unwanted electromagnetic emissions that could cause sound distortion. It includes a newly designed, highly precise volume controller, further elevating the audio experience. Designed to be modular, Themis offers easy maintenance due to its independent functionality from other card components, enhancing overall performance and reliability.
